Shivani Desai

Software Engineer

I'm a software engineer with 4+ years of experience in building user-friendly and scalable web applications. I work mainly with **ReactJS** , **Node.js** , **Angular** , and **JavaScript** . I'm good at creating new features from scratch, focusing on both performance and user experience. I enjoy working in teams and have collaborated with developers and stakeholders to deliver projects that meet both technical and business needs.

WORK EXPERIENCE

Software Engineer
Aspire Software Solutions

01/2021 - Present

Achievements/Tasks

○ Developed and maintained React-based web applications, integrated with MongoDB, Express, and Node.js. Contributed to Angular projects and created RESTful APIs. Applied basic AWS knowledge for cloud deployments and management, ensuring timely delivery of high-performance solutions.

○ Led and mentored junior developers, conducted interviews for freshers, and assisted in onboarding. Managed tasks end-to-end, providing guidance and support to ensure quality project delivery.

Frontend Developer (Intern)
Treebo Hotels

01/2020 - 07/2020

Achievements/Tasks

○ Gained hands-on experience in React by contributing to the development of the company's official website and m-site. Designed and implemented responsive email and customer feedback templates, alongside creating interactive forms to enhance user experience.

○ Collaborated closely with the team lead and cross-functional teams to deliver features on time while ensuring quality and performance. Played an active role in troubleshooting issues and implementing solutions that improved overall platform functionality.

Web Development

PERSONAL PROJECTS

Gitarth Ganga Library Project

○ A comprehensive library management system built to streamline and automate various library operations. The project supports cataloging, issuing and returning books and magazines, managing inventory, and storing metadata such as author, publication, and publisher details.

Portal For Land Registration Process

○ Land-DMS is application for Land-registration. User has to upload the land documents and there is process for approving the documents. After getting approval for the minister and registrar user can print the documents. Documents can be Re-printed as well.

Online Recruitment Portal:

○ Portal streamlines hiring with a structured process, including Job Description Creator, dynamic live interviews, and mobile-friendly assessments. It evaluates candidates against team culture and provides a data-driven dashboard to support informed, confident hiring decisions.

ACHIEVEMENTS

The Extra Mile Award (2024)

Received the "Extra Mile Award" for completing tasks ahead of schedule and effectively managing the team, reflecting my commitment to delivering results and ensuring smooth coordination.

Pat on the Back Award (2022)

Received the "Pat on the Back" award for implementing rich text popup functionality while managing another project and meeting its targets, showcasing my ability to handle multiple tasks efficiently.
